

SMILE Clinical Suite

Complete Dental Practice Management System

Imaging | Scheduling | Billing | Patient Engagement | Security

A unified clinical and operational platform built for modern dental practices.

SMILE Clinical Suite connects patient records, diagnostics, scheduling, financial workflows, and patient communication in one streamlined environment.

Unified Platform	Operational Efficiency	Imaging-First Workflow	Data Protection
Reduce fragmented tools and duplicate data entry.	Designed to lower administrative workload and improve throughput.	DICOM and 3D imaging embedded directly into daily clinical operations.	Role-based access, audit trails, backups, and HIPAA-aligned controls.

Why SMILE Clinical Suite?

Modern dentistry requires more than an appointment book. Practices need an integrated clinical, imaging, financial, and engagement platform that helps teams work faster without losing control of patient data, compliance obligations, or revenue-cycle visibility.

Eight Core Modules

Module	Capabilities
Dashboard: Command Center	<ul style="list-style-type: none"> Real-time metrics for appointments, patients, revenue, and performance trends. Quick-access task controls for urgent workflow actions. Insurance claim alerts and management visibility.
Patient Management: 360-Degree View	<ul style="list-style-type: none"> Comprehensive patient records with demographics, medical history, allergies, medications, documents, and treatment timeline. Smart search by name, patient ID, phone, or date of birth. Digital odontogram and secure clinical documentation repository.
Intelligent Scheduling	<ul style="list-style-type: none"> Visual multi-provider calendar with appointment status tracking. Conflict-aware scheduling to reduce double-bookings and missed appointments. Automated patient reminders and fast appointment

Module	Capabilities
<p>DICOM Imaging: Professional Radiology</p>	<p>creation.</p> <ul style="list-style-type: none"> • Universal DICOM viewer designed to support major sensor workflows. • Brightness, contrast, sharpness, and measurement tools for diagnosis support. • High-resolution storage tied to the patient chart.
<p>3D Imaging: Next-Generation Visualization</p>	<ul style="list-style-type: none"> • 3D visualization with rotation across X, Y, and Z axes. • Support for intraoral scan and CBCT-oriented workflows, including HeyinScan integration where applicable. • Side-by-side 2D and 3D review for implant planning and complex cases.
<p>Billing & Insurance</p>	<ul style="list-style-type: none"> • Invoice generation, payment tracking, aging reports, and daily cash reconciliation. • Denti-Cal and ADA-compatible claim workflow support. • Ability to attach radiographs and periodontal documentation to claims.
<p>Administration & Security</p>	<ul style="list-style-type: none"> • Role-based user permissions and administrative controls. • Custom treatment codes, pricing configuration, and complete audit trails. • Backup and disaster-recovery controls for operational continuity.
<p>Patient Portal: Digital Engagement</p>	<ul style="list-style-type: none"> • 24/7 patient access to appointments, balances, invoices, radiographs, and treatment information. • Self-service visibility that can improve patient experience and reduce front-desk calls. • Supports patient retention through better communication and transparency.

Competitive Differentiators

All-in-One Workflow	Imaging-First Architecture	Security and Control
<p>Fewer disconnected systems, fewer manual handoffs, and cleaner operational visibility.</p>	<p>Clinical imaging is not an add-on; it is part of the same patient and treatment workflow.</p>	<p>Local-server option, access controls, audit logs, backups, and privacy-aware design.</p>

Expected Practice Impact

Area	Potential Gain	How SMILE Supports It
Administrative time	Up to 40% reduction target	Automated scheduling, reminders, centralized records, and fewer duplicate entries.
Insurance collections	Faster claim preparation	Claim workflow support, document attachments, aging reports, and reconciliation controls.
Patient satisfaction	More transparent experience	Patient portal access to appointments, invoices, radiographs, and treatment notes.
Diagnostic workflow	Improved clinical review	DICOM tools, 3D visualization, measurement controls, and side-by-side imaging review.

Implementation, Security, and Support Considerations

- Deployment should begin with a workflow discovery session covering providers, imaging devices, front-desk processes, billing workflows, and reporting requirements.
- Security configuration should include named users, least-privilege roles, audit logs, backup validation, and disaster-recovery testing.
- HIPAA language should be validated during contracting. The safer positioning is that SMILE is designed to support HIPAA-aligned workflows, not that compliance is guaranteed by software alone.
- Data migration planning should include patient demographics, clinical records, documents, radiographs, claims history, and retention requirements.

Ready to See SMILE in Your Practice?

Schedule a personalized demo using your real workflow scenarios: imaging, scheduling, billing, and patient portal operations.
